12:05:00 GMT Scrum (software development) - Wikipedia - We are uncovering better ways of developing software by doing it and helping others do it. Through this work we have come to value: Individuals and interactions over processes and tools Working software over comprehensive documentation Customer collaboration over contract negotiation Responding to change over following a plan. That is, while there is value in the items on Mon, 14 Jan 2019 07:37:00 GMT Manifesto for Agile Software Development - Scrum is a subset of Agile. It is a lightweight process framework for agile development, and the most widely-used one. A "process framework" is a particular set of practices that must be followed in order for a process to be consistent with the framework.

Sun, 09 Jan 2011 23:57:00 GMT What is AGILE? | What is SCRUM? | Agile FAQ's | cPrime - From Nothing, to Monumental, to Agile. Most software development is a chaotic activity, often characterized by the phrase "code and fix". The software is written without much of an underlying plan, and the design of the system is cobbled together from many short term decisions.
